# RUBEEL AHMED - Front-End Developer
Al-Karama, Burjman (Dubai), UAE | +971 -545440637 | [Linkedin](#) | dev.rubeel@gmail.com

## OBJECTIVE

Result-driven Software Engineer, having **5+ years** of hands-on industry experience, expert with multiple languages, tools, and web technologies, and ability to work under pressure within a team or independently, **Passionate** to work with **cutting-edge web technologies** in a fast-paced environment.

## TECHNICAL SKILLS

- **Programming Skills:** JavaScript, TypeScript, C/C++, SQL, HTML5/CSS3
- **Web Development:** MERN, MEAN, RESTful API, Postman, CI/CD principles, swagger, git/GitHub/Bitbucket, Jira.
- **Framework & Libraries:** React, Redux, Context-API, React-Hooks, Angular 2+, NodeJS, Express
- **DBMS:** SQL, Firebase, MongoDB, Postgresql, AWS Dynamodb, Redis(In-memory storage)
- **Cloud:** Amazon Web Services (Amplify, Lambda, API-Gateway, CloudWatch, DynamoDB, S3, SNS, etc )
- **Payment Gateways:** Stripe, Paypal, JazzCash, PayPro, PayMax
- **Soft Skills:** Team Work, Communication, Problem Solving, Time Management

## PROFESSIONAL EXPERIENCE

### Full Stack Software Engineer(Frontend Heavy) | NEXTRICK INC | 01/2023 - 07/2023
CAFEZUPAS
- Worked with a large-scale team of **30+ members** on a **Million dollars** generating revenue Project, that provides an **e-commerce** food store in the US with a fully functional Online Food Ordering, Delivering, and Food Chaining System.
- Worked on the **Checkout and Cart module**s Using React(TypeScript), Redux, React-Hooks, Formik, React-Query, and **Custom-Hooks,** from selecting Orders of Different Types to Selecting Dates and Timeslots of Orders Payment Methods and finally placing an order.

### Software Engineer | TKXEL | 10/2021 - 12/2022
DENTSCAN
- Worked in a team of **5 people**, with a client that provides **Scanning Automotives Dents** checking & evaluating service with costless repairing Solutions. Achieved building the features of **Adding Detns details, calculation of dents repair time ratio, and generating details** of dents.
- Responsible for building app using **Angular2+** and implemented modules related to Dents Images and details, Automotive details, and reports UI and cost calculation based on the type of automotive.

SAMPOLL
- Worked as a solo developer with a technical client that provides services for running campaigns for customers in **US** market.
- Responsible to Implement a web application using **React(TypeScript), NodeJS, and AWS technologies.**
- Responsible for Integrating **AI-based live chat** to interact with clients using **Google Dialogflow and chatbots**.
- Responsible for implementing passwordless and one-click authentication using third-party API i.e. **Magic-Link-Authentication.**
- Implemented robust **restful APIs** using **NodeJS** and deployed the APIs on **AWS API-Gateway using AWS CLI** to enable the developers to test their code on a real server before deploying on the Dev environment.

MEDFLOW SAFECAMP
- Safecamp company provides health care solutions in the **US** including Covid Testing, Ordering, Scheduling, and processing.
- Responsible for building the Frontend of the App in **React JS, Redux, React-Hooks, and NodeJS using Express.**
- Worked on **cloud technologies** using **AWS Amplify, Lambda Function, API Gateway,** and **Dynamodb, S3, SNS.**
- Implemented multiple functionalities from the test creation, and conduction to results publishing and reporting using ReactJS.
- Performed extensive refactoring to the frontend components and implemented a dashboard with Charts by using the **React-Chart.js** library that organized users, and labs and showed data in a more **user-friendly** way.
- Implemented an alerting system for Labs & Clients using React on Fron**AWS Lambda functions, AWS Dynamodb, Cloud watch, Redis, and SNS** sent reports to users and lab admins using messages and email services about the number of tests conducted, pending, and approved.

### Full Stack Software Engineer, APPTIMAL SOLUTIONS | 05/2019 - 11/2021
DAWAIATDOOR
- Responsible for **85% of the contribution** to designing and developing this project from scratch.
- Design and Develop Order Placement to the operator, Order details Management and processing from the operator to the rider, and handling of user's Authorization, Rider tracking system, Chat System, Payment gateway Integration, and Cart System.
- Worked on Performance optimization using **Angular 2+, NodeJS, SQL, and Payment Gateways (JazzCash, Stripe, PayPro).**
TABIR ACADEMY
- Worked in a team of **4 people** in an edu-tech startup to provide online service for entrance exam preparation to their locals.
- Responsible for developing an **E-Learning** platform using **Angular 2+, SQL**.
- Responsible to work on the admin panel to add the functionality of adding quizzes and questions related to the courses.

## EDUCATION

**FAST - National University of Computer and Emerging Sciences, Lahore (NUCES)** | *2015– 2020*
**Bachelor of Science in Computer Science (**Courses: Object Oriented Programming, Web Development, Database, Software Engineering, etc.)
